PROJECTS

Handy App — Node.js, Java

- This project aims to connect the tradespeople to the people that need their services and skills.
- In the app, sellers that are selling their services and skills signup and upload information about their services, images, and any other relevant information.
- Project details here: <https://github.com/moh-558/HandyApp>

AM-FM Radio — C++

- This program shows how the radio works by displaying a menu to the user asking him to make a selection, first the user should turn the radio on in order to be able to interact with the radio options, the user can select station and volume and can set buttons too.
- Project details here: <https://github.com/moh-558/AM-FM-Radio>

Social-Media-app Backend — JavaScript, Sql

- This Project aims to mimic the behavior of real life social media app backend. It is a CRUD application, each user can create a post or update an old post and delete and like posts.
- The project contains automated test to test the backend api
- Project details here: <https://github.com/moh-558/Social-Media-app-Backend>
